

TRAINING MODULE (MOD-ECDP) (Duration: 2 Days)

Environmental clearances for Development projects:

Orientating senior officers of Government, Public and Private Sectors

The need for sensitization and capacity building of decision makers of Government, Public and Private Sectors on the issues pertaining to environmental matters cannot be over emphasized. With ever growing prominence of the requirement of balancing the development and environmental needs impacting the decision making processes, the senior functionaries need to appreciate the intricacies of parameters that determine sustainability issues today. The sustainability of development being ultimately dependent on the sustainability of natural resources and early and timely decisions being crucial for ensuring maintenance of the desired cost-benefit ratios, it is necessary that the decision makers are exposed to the systems and processes of forest and environmental clearances prevalent in the country today.

The general topics covered in this programme are:

1. Awareness about Environment: Introduction.
2. Global warming: Introduction.
3. Environment and Forest related major Acts in India.
4. International conventions and treaties on biodiversity and environment: An Introduction
5. Development and Environment conservation.
6. Clearances required for development projects in India: Authorities and systems.
7. Processes pertaining to clearances under Forest Conservation Act, Environment protection Act, Coastal Zone regulation etc.: operationalizing in project mode.
8. Environment Impact Assessment. (Case studies)
9. Impacts of delayed projects pending clearance.(Case studies)
